

Birds of Bolivia 2.0 / Aves de Bolivia 2.0 (version 2.0)

This CD-ROM contains 2500 sound recordings (over 19 hours) of 941 bird species, all occurring in Bolivia, with accompanying texts and identifications of all background species. And the CD-ROM many has photographs: 1225 of 756 species (639 occurring in Bolivia and an additional 117 species from northern Peru and Ecuador). Please note: This CD-ROM is made for a PC but will run on a MAC using virtual PC or similar. version 2.0 does not run on the 64-bit versions of Windows XP, Vista, and 7. This CD-ROM is of even more significance because so many South American birds can only be found or identified by their voices. Good examples are the Tinamous (18 species on the CD-ROM), Owls (25 species), Nightjars and Potoos (21 species), and those quintessential South American bird families: the Antbirds and Ground Antbirds (92 species). Many, if not most of the species on this CD-ROM are not found on commercially available cassette tapes or audio CDs. It has recordings of many rare and seldom (if ever) recorded species, like Huayco Tinamou, Horned Curassow, an unseen Screech-Owl which is either Cloud-forest Screech-Owl or an undescribed species, White-winged Nightjar, Bolivian Spinetail, Bolivian Recurvebill, Yungas Antwren, Masked Antpitta, two undescribed Flycatcher species, Rufous-sided Pygmy-Tyrant, Ash-breasted Tit-Tyrant, Buff-throated Tody-Tyrant, Sharpbill, Chestnut-crested Cotinga, Yellow-shouldered Grosbeak, Black-and-tawny Seedeater. Also suitable for Argentina, Brazil, Paraguay, Chile and Peru.
